- Improved reporting
- Identification of many use cases across multiple departments

### Company Profile

The Evansville Water & Sewer Utility provides water and sewer services to the city of Evansville, Indiana and the surrounding metro area.

Their mission is to provide high quality, safe, dependable water and sewer service at rates which encourage economic development. The Utility also works to manage land and water resources to ensure quality for future generations.

**Headquarters :** Evansville, Indiana

**Industry:** Utilities

“ With the help of Keller Schroeder’s Data Strategy Group, we were pulling data from different streams and able to visualize it like we weren’t able to do before. We look forward to working with Keller Schroeder as always. They have been great. ”

- Chris Moody,  
Software Engineer | EWSU
